## ***NATURAL HOME LITE LIFETIME LIMITED WORKMANSHIP WARRANTY***

Clients of **Natural Home Lite** can feel confident that the VELUX Skylight Products will perform without defects associated with installation. Each VELUX Skylight Product is professionally installed by factory-trained technicians that have completed the ***Installation Training*** provided by **VELUX**. As a result of this training and because we practice the “best skills” method of installation, you can be assured that each VELUX Skylight has been properly fastened to your roof deck. Therefore, **Natural Home Lite** extends a **LIFETIME LIMITED WORKMANSHIP WARRANTY** against leaks (water penetration) caused by the installation of the VELUX Skylight **for the life of the homeowner’s existing shingle roof**. In the event of a new roof application, Natural Home Lite will no longer warrant the VELUX Skylight Products from installation defects once a new roof has been installed. The roofing contractor will be responsible for all new flashing of VELUX products. Natural Home Lite cannot and does not assume the responsibility for the loosening and reattachment of the VELUX Skylight Product during the re-roofing process.

Workmanship for all other roof types (other than shingle) and commercial applications are warranted for a period of three years from the date of installation.
