

## Natural Home Lite Lifetime Limited Workmanship Warranty

Clients of **Natural Home Lite** can feel confident that the Skylight Products will perform without defects associated with installation. Each Skylight Product is professionally installed by factory-trained technicians that have completed the **Factory Installation Training** program. As a result of this training and because we practice the "best skills" method of installation, you can be assured that each Skylight has been properly fastened and waterproofed. Therefore, **Natural Home Lite** extends a **LIFETIME LIMITED WORKMANSHIP WARRANTY** against leaks (water penetration) caused by the installation of the Skylight and/or Daylighting System **for the life of the homeowner's existing shingle roof. This Labor Warranty is transferable once to next home buyer.** In the event of a new roof application, Natural Home Lite will no longer warrant the Skylight Products from installation defects once a new roof has been installed. The roofing contractor will be responsible for all new flashing of Skylight product. Natural Home Lite cannot and does not assume the responsibility for the loosening and reattachment of the Skylight Product during the re-roofing process.

The **LIFETIME LIMITED WORKMANSHIP WARRANTY** applies to **all** Traditional Skylights, Tubular Daylighting Systems, and Solar Powered Attic Ventilation Fans Installed by Natural Home Lite.

Workmanship for all other roof types (other than shingle) and commercial applications are warranted for period of three years from the date of installation.
